

Please do not allow LPFM stations to take priority over current FM translator services. I am an dedicated listener of K-LOVE radio, along with many friends. This radio station encourages us each day with its uplifting music, talk and news. We need positive programming, when many of the other stations are dedicated to music about wasted lives, drugs, and broken relationships: our children need other role models and benefit from them. K-LOVE is one of those stations that gives Americans a national sense of community, please preserve this.

The other radio station that is a priority on my dial is NPR, I do not know if this will be affected by the LPFM, but it will, then you will be destroying one of our nations best educational and news radio programming our Country has available to us. This is another radio station that helps provide a sense of National Community.

Help preserve these stations that have become a vital means of encouragement and information.

Sincerely, Kathleen Garcia - Radio listener
